

We All Are Targets!

Safety tips to improve your security

TIP 1

AUTHENTICATION

- Never share your password
- Change your password frequently
- Avoid using personal information
- Do not reuse passwords
- Make it long & use a mix of characters
- Use a password manager
- Use two\multi-factor authentication

TIP 3

PROTECT ALL YOUR DEVICES

- Backup your data
- Keep your devices up-to-date
- Have an antivirus and firewall

TIP 2

SECURE NAVIGATION

- Always use a VPN
- Attention to what you click
- Be careful on public networks
- Beware of suspicious emails and phone calls

TIP 4

PRIVACY

- Cyber criminals can learn a lot about you through your digital footprint. Be careful of what to share and where you share it.
