CYBER SAFETY: ONLINE BANKING TIPS

online banking

01

ONLINE ACCESS PRIVACY AND SAFETY

The use of a VPN is higly recommended. Software solutions are widely available and they can help you keep yourself protected.

02

AUTHENTICATION

Always use strong passwords and keep them safe. Rotate your passwords in a regular basis and never share it with anyone or store it unscurerely

03

ALWAYS LOGOUT

Always be mindful and logout of your online banking menu session and close your browser

04

POP UPS

Be Aware of windows that pop-up during your online session and remain extra vigilant if they redirect you to another website. If that is the case never ever provide with your password and or PIN again.

05

AVOID PUBLIC WIFI

Stay away from public WIFI for any of your online banking tasks as this poses a critical risk to you. Avoid it al all cost!

Remeber security starts with YOU! Surf safely.
